Bespoke Staircases

Bespoke staircases for luxury homes

# Realising your dream staircase

Getting the interior design of your home to reflect your vision is a challenge that we at Spiral UK completely understand.

We have been working with homeowners and architects for over 30 years to ensure that the staircase designs we receive are translated into stunning staircases that complement the overall architectural and interior design of the property.

### The highest standards of design and build.

Our staircases are bespoke and built in house to ensure that our high standards of design and build are met on time and to budget.

Our team of design engineers will take your drawings and produce detailed 3D designs and renders to explain how the stair will work. Skilled metalwork craftsmen will then ensure your staircase is built to meet our detailed specifications, on time and to budget. With our install team often working alongside our manufacturing team to understand the most effective installation process. This is before they even arrive at site so they can make sure the finish is perfect for our clients.

"OUR EXPERIENCED TEAM OF DESIGN ENGINEERS, SKILLED STEEL CRAFTSMEN AND INSTALLERS ENSURE THE PERFECT FINISHED STAIR FOR YOUR HOME."

## Our staircase designs

At Spiral UK we produce a range of high-end bespoke straight, spiral, helical (curved) and cantilever staircases for home renovation and new build developments.

We understand that it can be difficult to choose the right style of staircase for your home so our website has a section that explains the different staircase types available and gives examples of what they look like in situ. Visit: [www.spiral.uk.com](http://www.spiral.uk.com) to find out more.

## How we translate your vision

We want to ensure that we turn your home staircase design into reality so we work with you every step of the way to make sure this happens.

Our service process is designed to help you achieve the staircase you desire. We do this in the following ways depending on the help you require.

- We can meet with you face to face to discuss staircase design ideas and options like materials and finishes. We can talk through designs, visit site and discuss approaches to ensuring a successful stylish end product.
- We can provide free material samples to ensure matches with flooring and other interior design features.
- We are happy to liaise with project managers, interior designers, architects or builders to ensure that as the development evolves the staircase design and installations will still work.
- Our design team are able to produce 3D CAD drawings and renders of your staircase to give everyone in your project team a real feel of how it will work in the space.
- Our design engineers will produce complex technical drawings and calculations that will ensure a beautiful staircase that is both functional and compliant.
- We will work with your project team to manage the process so everyone has a clear understanding of how the staircase will work in the space and meet requirements.
- Our visits to site will ensure a perfect fit.

"OUR DESIGN, MANUFACTURE AND INSTALL PROCESS IS ALL KEPT IN HOUSE TO ENSURE OUR HIGH STANDARDS ARE MET ON TIME AND TO BUDGET."

# Materials and finishes

Many of our staircases are crafted from a steel structure but we work with a range of materials including steel, timber, concrete, stone, glass and stainless steel.

## Treads

You can choose from different treads in wood, glass or concrete and we can supply samples.

## Finishes

We can supply the stairs pre-finished or ready to receive final in situ spraying, we can do the spraying or leave the stair primed ready for site decoration. Finishes include painted steel, powder coating, stainless steel, weathered steel, wet paint or lacquered.

## Handrails

Our handrails can also be designed and installed in stainless steel, wood, glass, timber or leather clad.

## Balustrade

In addition to installing balustrade and handrails as part of a staircase installation we can also design and fit balustrade for balconies, landings or terraces which complement the overall design of a building. We offer this in a range of materials including steel, wood, glass, timber or leather clad.
